Laser Removal

DELETE

removal with remover and laser

- Basics (general information).
- Differences in removal methods.
- Medical aspects.
- Choosing the method (by zone, skin type, quantity and depth of pigment, pigment color, and presence of neoplasms and/or scars).
- Basic principles of pigmentology (only aspects that influence removal).
- Removal protocols.
- Do you really need it? (remove, lighten, or refresh).

- Equipment.
- Theory and practice (Sofia works, students observe; students work, Sofia supervises and corrects where necessary).
- Support after training (students can ask Sofia questions, send photos of their work for analysis, or photos of clients if they are uncertain about the best removal method).

Duration: 2-3 half-days

Cost: €1490 (excl. VAT)

Invoice available on request.

Individual training or in groups of up to
2 people.
